

Front Section (Executive Readout) Template v2

Use only after the appendix workbook is complete

This template preserves the original section order and the original macro-writing discipline from the source prompt.

Run parameters

Field	Value to edit
Country	[Country]
Timeline	[YYYY-MM-DD] to [YYYY-MM-DD]
Retailers in scope	[Retailer 1, Retailer 2, Retailer 3, ...]
Analyst / run owner	[Name]
Version	[v1 / v2 / final]

Hard front-section rules

Control	Instruction
Order of operations	Complete the appendix workbook first. Write the front section second.
Evidence discipline	No speculation. No invented numbers. No unsourced claims. Each sentence must carry Harvard-style in-text citations.
Technology discipline	Technology trends must come from a separate pulse-only pass. Do not form them from Whisper Tags.
Writing discipline	No em dashes. Keep language concise, mechanism-led, and evidence-only.

A) Summary (max 200 words)

- State total pulses captured (N) and coverage notes, including retailers with low evidence if relevant.
- State total Whisper Tags generated (N).
- State total Macro Trends generated (N).
- State total CIPHER buckets used for Whisper Tag regrouping (N).
- State total attribute-led Whisper Tag buckets used (N).
- State total technology trends identified from pulses through CIPHER (N).
- Draft summary paragraph placeholder: [Write one synthesis paragraph linking evidence density, retailer coverage, and the most repeated mechanisms in the pulse base. Use citations in every sentence.]

B) Macro Trends (6 total)

Macro Trend 1

Field	Value to edit
MacroTrend_ID	MT01
Trend name	[3-6 words; country-specific; mechanism-based]
Primary WhisperTag_IDs used	[WT., WT., WT.]
ProofPoint_Pulse_IDs	[P., P., P.]

Narrative sentence structure (up to 300 words)

- What the Macro Trend is and what is changing, grounded only in the assigned Whisper Tags and pulses.
- Identify 2-4 key drivers using only repeated mechanisms or enabling conditions already present in pulse summaries and Whisper Tag micro-stories.
- A stated driver must appear in at least 3 pulses across at least 2 parent retailers, or in at least 2 Whisper Tags.
- Use the same wording family already present in the evidence. Do not introduce external causal language, analyst interpretation, or implied motivation.

Driver block

Driver	Evidence threshold met?	Citation(s)
[Neutral evidence statement]	[Yes / No]	[Publisher/Company, Year]
[Neutral evidence statement]	[Yes / No]	[Publisher/Company, Year]
[Neutral evidence statement]	[Yes / No]	[Publisher/Company, Year]
[Neutral evidence statement]	[Yes / No]	[Publisher/Company, Year]

Proof points (top 5-8; max 2 per parent retailer)

Rank	Pulse_ID	Retailer	Why it fits this Macro	Citation
1	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]
2	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]
3	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]
4	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]
5	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]
6	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]

			reason]	Year]
7	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]
8	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]

ProofPoint Score = Mechanism Fit to Macro Trend (0-4) + Representativeness within assigned Whisper Tag (0-2) + Source Strength (0-2; Tier 1 = 2, Tier 2 = 1, Tier 3 = 0 for validation only) + Material Specificity (0-1) + Recency within window (0-1). Use higher scores first; break ties by stronger source, then by broader retailer distinctiveness.

Tier 3 can be used only to cross-check whether the identified Macro aligns with or contradicts forecast reports.

Macro Trend 2

Field	Value to edit
MacroTrend_ID	MT02
Trend name	[3-6 words; country-specific; mechanism-based]
Primary WhisperTag_IDs used	[WT., WT., WT.]
ProofPoint_Pulse_IDs	[P., P., P.]

Narrative sentence structure (up to 300 words)

- What the Macro Trend is and what is changing, grounded only in the assigned Whisper Tags and pulses.
- Identify 2-4 key drivers using only repeated mechanisms or enabling conditions already present in pulse summaries and Whisper Tag micro-stories.
- A stated driver must appear in at least 3 pulses across at least 2 parent retailers, or in at least 2 Whisper Tags.
- Use the same wording family already present in the evidence. Do not introduce external causal language, analyst interpretation, or implied motivation.

			reason]	Year]
8	[P...]	[Retailer]	[Evidence-only reason]	[Publisher/Company, Year]

ProofPoint Score = Mechanism Fit to Macro Trend (0-4) + Representativeness within assigned Whisper Tag (0-2) + Source Strength (0-2; Tier 1 = 2, Tier 2 = 1, Tier 3 = 0 for validation only) + Material Specificity (0-1) + Recency within window (0-1). Use higher scores first; break ties by stronger source, then by broader retailer distinctiveness.

Tier 3 can be used only to cross-check whether the identified Macro aligns with or contradicts forecast reports.

C) Whisper Tags regrouped through CIPHER

Bucket name	Plain-English explanation	WhisperTag_IDs and names included	Why these belong together
[Contradictions / Inflections / Practices / Hacks / Extremes / Rarities]	[Explanation]	[WT.. Name; WT.. Name]	[Reason]
[Contradictions / Inflections / Practices / Hacks / Extremes / Rarities]	[Explanation]	[WT.. Name; WT.. Name]	[Reason]
[Contradictions / Inflections / Practices / Hacks / Extremes / Rarities]	[Explanation]	[WT.. Name; WT.. Name]	[Reason]
[Contradictions / Inflections / Practices / Hacks / Extremes / Rarities]	[Explanation]	[WT.. Name; WT.. Name]	[Reason]
[Contradictions / Inflections / Practices / Hacks / Extremes / Rarities]	[Explanation]	[WT.. Name; WT.. Name]	[Reason]
[Contradictions / Inflections / Practices / Hacks / Extremes / Rarities]	[Explanation]	[WT.. Name; WT.. Name]	[Reason]

Do not change Whisper Tag names, pulse sets, or primary Macro Trend assignments in this section.

D) Whisper Tags regrouped through Attribute-led buckets

Cleaner Macro name	Linked attribute bucket(s)	WhisperTag_IDs and names included	What story the bucket tells	Why grouped together
[Cleaner Macro name]	[Attribute bucket(s)]	[WT.. Name; WT.. Name]	[Story]	[Reason]

[Cleaner Macro name]	[Attribute bucket(s)]	[WT.. Name; WT.. Name]	[Story]	[Reason]
[Cleaner Macro name]	[Attribute bucket(s)]	[WT.. Name; WT.. Name]	[Story]	[Reason]
[Cleaner Macro name]	[Attribute bucket(s)]	[WT.. Name; WT.. Name]	[Story]	[Reason]
[Cleaner Macro name]	[Attribute bucket(s)]	[WT.. Name; WT.. Name]	[Story]	[Reason]
[Cleaner Macro name]	[Attribute bucket(s)]	[WT.. Name; WT.. Name]	[Story]	[Reason]

Do not change Whisper Tag names, pulse sets, or primary Macro Trend assignments in this section.

E) Technology trends (evidence-only; CIPHER on pulses only)

Rank	TechTrend_Name	Primary_CIPHER_Bucket	Pulse_IDs_Used	Evidence-only readout
1	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]
2	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]
3	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]
4	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]
5	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]
6	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]
7	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]

				first]
8	[Technology trend name]	[CIPHER bucket]	[P., P., P.]	[1-2 sentences; pulses only; rank by retailer breadth first]

F) Unassigned Whisper Tags (if any)

WhisperTag_Name	Evidence-only reason it did not cluster
[Whisper Tag]	[Reason]
[Whisper Tag]	[Reason]
[Whisper Tag]	[Reason]
[Whisper Tag]	[Reason]
[Whisper Tag]	[Reason]
[Whisper Tag]	[Reason]

Reference list

- Insert Harvard-style reference list.
- Separate official retailer evidence, official country context, Tier 2 news validation, and Tier 3 validation if useful.
